Some similarity in C-teminal membrane spanning domains. Some similarity in C-teminal membrane domain to eukaryotic proteins e.g. CCSA_CHLRE cytochrome C biogenesis protein CCSA_(353 aa), fasta scores; opt: 459 z-score; 515.4 E(): 2.1e-21, 36.0% identity in 267 aa overlap, and to prokaryotic equivalents e.g. CCMF_ECOLI cytochrome C-type biogenesis protein CCMF_(647 aa); BLAST9 scores; E = 0.20, 24% identity in 293 aa overlap, 39.0% identity to HP0378.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             /db_xref="SPTREMBL:Q9PNS9"

It currently consists of 4 contigs. Gaps between the contigs are represented as runs of N. The order of the pieces is believed to be correct as given, however the sizes of the gaps between them are based on estimates that have provided by the submittor.

* This sequence will be replaced
